牙刷的使用

您可以选择任何一种牙膏。为了避免牙膏溅出,请在开启产品前确保牙刷头已经放在 牙齿表面。请在牙齿间慢慢移动刷头,在每颗牙齿表面停留几秒钟。按照牙龈的曲线和每 颗牙齿的形状进行清洁,先刷牙齿的外侧再刷内侧,最后是咀嚼面(1)。请勿用力挤压或 摩擦,只需让牙刷自己完成所有工作即可。

压力感应器

牙刷安装了压力控制感应,可满足您最佳的刷牙力度。当刷牙用力过度时,牙刷刷头仍然 保持左右转动,但前后震动将会停止。同时您也会听到牙刷发出不同的响声。

专业刷牙计时器

短暂的提示音会每隔30秒钟发出,提醒您应更换"四区间环"的下一个刷牙区域。长声的提示音会提醒您建议的两分钟刷牙时间已经完成。在刷牙过程中,如果暂时关闭手柄,定时器仍能存储已经用去的刷牙时间,但如果关闭时间超过30秒,定时器将会重置时间。

使用本电动牙刷的最初几天,您的牙龈可能会有轻微的出血现象,这种情况一般会在几天 后消失。如果这种情况持续两周以上,请与您的牙医联系。

Description

- B On/off button
- C Handle
- D Charge indicator
- E Charging Unit

Connecting and charging

Your toothbrush has a waterproof handle, is electrically safe and designed for use in the bathroom.

- Plug the charging unit (E) into an electrical outlet and place the toothbrush handle (C) on the charging unit.
- The green charge indicator (D) light flashes while the handle is being charged. Once it is fully charged, the green charge indicator light shines continuously for 5 seconds and then it turns off. A full charge takes at least 18 hours and enables approximately one week of regular brushing (twice a day, 2 minutes).
- When the rechargeable battery is low, the red charge indicator (D) light starts blinking after turning off.

- For everyday use, the toothbrush handle can be stored on the charging unit to maintain it at full power. Overcharging is impossible. However for environmental reasons, Oral-B recommends to unplug the charger until the next recharge is required.
- To maintain the maximum capacity of the rechargeable battery, unplug the charging unit and fully discharge the handle with regular use at least every 6 months.

Using the toothbrush

You can use any kind of toothpaste. To avoid splashing, guide the brush head to your teeth before switching on the appliance. Guide the brush head from tooth to tooth, spending a few seconds on each tooth surface. Brush the gums as well as the teeth, first the outsides, then the insides and finally the chewing surfaces (1). Do not press too hard or scrub, simply let the brush do all the work.

Pressure Sensor

To promote optimal brushing your toothbrush has a pressure control feature installed. If too much pressure is applied, the oscillating movement of the brush head will continue but the pulsation will stop. In addition you will also hear a different sound while brushing.

Professional Timer

A short stuttering sound at 30-second intervals reminds you to brush equally all four quadrants of your mouth. A long stuttering sound indicates the end of the professionally recommended 2-minute brushing time. The elapsed brushing time is memorised when the handle is briefly switched off during brushing. When pausing for longer than 30 seconds the timer resets.

In the first days of using the toothbrush, your gums may bleed slightly. In general, bleeding should stop after a few days. Should it persist after two weeks, please consult your dentist or dental hygienist.

Individual brush heads and accessories

Your **Braun Oral-B Professional Care** offers you a variety of brush heads and accessories, allowing you to select those, which best meet your individual needs.

1 Braun Oral-B Precision Clean brush head

The Advanced Bristle System of the Braun Oral-B Precision Clean brush head removes plaque and cleans deep between teeth and below the gum line.

2 Braun Oral-B Pro White brush head

The Braun Oral-B Pro White brush head is specifically designed to polish and naturally whiten your teeth by removing surface stains that can come from coffee, tea and tobacco. It features the oscillating-rotating head action of

the Braun Oral-B Precision Clean brush head to effectively clean teeth, combined with the special polishing cup for natural brightening.

Children under 12 years old should not use the Braun Oral-B Pro White brush head.

All two brush heads feature blue INDICATOR® bristles to help you monitor brush head replacement need. With thorough brushing, twice a day for two minutes, the blue color will fade halfway approximately within 3 months, signalling it is time to change the brush head (2a–2c).

Braun Oral-B Professional Care replacement brush heads and accessories are available in stores that sell Oral-B products.

Cleaning

After use, rinse the brush head for several seconds under running water with the handle switched on. Then switch off the handle and remove the brush head. Rinse both parts separately under running water (3) and wipe them dry. From time to time, also clean the charging unit with a damp cloth (4).
